HONOLULU, AUGUST 14, 1818. sworthy stem of the past week is the infor mution that the Chetom House authorities at San Frantractions from the Treasury Department at Washington City, here placed Hawailan washed sugars uder the head of refined sugars, and have assessed the duty on them as a refined article. This was not expected portant to them. As the process to which raw sugars of these stands are subjected, being merely a slight washing to reader the sugars cleaner and more mark-table, our planters did not focus that such a process amounted to refixing sugars, the latter process requiring not only a great deal of latter and express, but medical sal manipulation to complete the process of refining angar for the market. The the Treasury Department at Washington is refining, in making the washed sugars the subject of duty as above stated. The duties on washed sugars will be publ under profest, until the Trensury Department shall determine procity Treaty. Whiter all our sympathies on this subject are cuturally with the planters of Hawaii, and whilst we could prefer that the Treasury Department, would construe the Treaty more liberally, we confess to serious misgleings n this question, as to whether the Transury Department has not put upon the Trenty a fair, although a very strict construction; but he the matter is yet in abeyance, and must be finally left to the Courts of the United States for we deem it best to leave it for these tribunals to settle, which will so doubt be submitted to them before charged. If the Treasury Department inslets upon its de-

up to the latest dates per stemphip Zealandia, by which we learn that the total importations of sugar the present on to dute have been \$1,372,5000 lbs, of which 19,-277,500 Re, were from the Hawaiian Islands. The estimate s, that there will be a falling off in the amount produced this year, as against the crop of last year of from 25 to 39 cane growing. Whather this estimate is correct or not retheline that there will not be any folling off, but that the crop this year, will fully equal last year. The stock of ered ample to meet all immediatdemands, with a grawing consumption of all grades, which will call for all that can be offered at reasonably ren tive prices. In rice there seems to be a scurcity and the market is but slimly supplied with the article, which is enkneed does not expeed 200,000 mate. The following from the nan Francisco Murket Review is

the latest. Sugar No 1 7/4980; No 2 697c. Bice 6/497c.

The coasting steamer "Walmanale," for F. S. Pratt Esq., built at San Francisco, arrived at this port Monday last, in safety after a passage of 14 days and 12 hours. The coasting steamer for Mesers. Witder & Co., also built at San Franaffive in due time.

The arrivals during the week were Am brig Sea Walf, from Seattle, with coal; British ship City of Perth, from iverpool with general merchandles, to T. H. Davies; Haw stenmer, Walmannio from San Francisco, to F. S. Pratt, Esq., Mail steamer Zeslandia, from San Francisco, with merchan-

dise to ri. Enschibrid & Co.

NOTES OF THE WEEK. The Russian man-of-war left on Sunday last, en route for Yokohama, Japan.

Attention is called to the new time table of se steamer Likelike, which will be of interest to

The mail steamer brought an unusually large number of passengers for this port—some 150 —90 of whom are Chinese. We are indebted to the Merchant's Ex-

change, San Francisco, for late files; also to the Purser of the steamer Zealandia for memoranda of CITY OF PERTH.-This fine large iron ship arrived in port on last Monday morning, 115 days from London, with a cargo of assorted general merchan-disc, consigned to the house of T. H. Davies, Brit-ish Vice-Consul.

TELEGRAPHS AND TELEPHONES.-Mr. Daniel Echeverria is now in this city as an expert in the business of creeting and constructing lines of telegraph or telephone, wherever required. He has had years of experience in the business, and therefore is pre-pared to give satisfaction to all who may employ him.

To those desiring to secure a fine homestead, we would call attention to the family residence, known as the Sider's premises, on Punchbowl street, to be offered at public sale by Mr. Bartow this day, at 12 o'clock. Also, on Saturday next, at 12 m, a fine house and large iot on Berstania street, east. See advertisments to Mr. Bartow's column for particulars.

ARRIVAL OF THE "WAIMANALO."-The beautiful little steamer Waimanalo, built and equipped for F. S. Pratt. Esq., of this city, at San Francisco, arrived in this port on the 12th inst., after a passage of 14 days and I2 hours; showing a speed of nearly 140 miles in 24 hours, which is pretty fast time for so small a vessel. She is not yet registered, so that her actual measurement is not known. She is about 50 tons; will carry 400 kegs of sugar, and will be

A benefit for Honolulu Engine Company No. will be given by the Honolulu Amsteur Minstrels. at the Royal Hawsiian Theater, on this Wednesday evening, on which occasion we hope a full bour will be secured. It is a praise worthy object and should call forth a full house. No class of citizens deserve more ald and encouragement than the noble firemen, and Eugine Company No. 1, should be foremost in the list of public benefactors.

ANOTHER INVOICE.-More new goods at McInerney's, corner of Fort and Merchant streets, where can be found any and every article for man's comfort and adorament. His stock, consisting of bats, cinthing, gentlemen's underwear, dress shirts of the best make, shoes, notions of all kinds, jewelry, &c., is large and selected with great care, taste and judgment, comprising everything necessary for a treat class outfit. All goods of the best quality, at reasonable prices. Give him a call and get an equivalent for your money by purchasing some ne-cessary article. Don't forget the place, McInerney, corner of Fort and Merchant streets.

R. Hollister of this city, we have seen a few specicision on this question, there is no other remely for the mens of the wooden corks, manufactured by partpurlies except an appeal to the Federal Courts for their de- les in San Francisco. These corks are made of wood subjected to same process only known to the patentee, by which the wood is rendered as com-pressible as cork, and if this compressibility can be retained in the wood, we see no reason why the wooden corks should not answer the purposes of ordinary corks. We understand that the wooden corks can be had for a much lower figure per thousand or by the gross than the corks now in use.

We merely mention this fact as an item of news,
concerning a new discovery which may be of service to those who have use for large quantities of
corks in their business.

MORE NEW IMPROVEMENTS .- We are pleased to learn that the enterprising firm of Bolles & Co. are about to commence the erection of a fine new brick building on the cite of their present place of business, which is to be built under the direction of Mr. Baker the contractor. It is gratifying to know the growing trade of the city justifies the erection of so many new buildingsas we have recorded from time to time, within the past six months. We hope our enterprising citizens of capital will not weary in well-doing, but that many more of them will follow the example of Messrs. Bolles & Co., by puting up scores of new buildings all over the city There never was a time when new buildings could be put up so cheaply as at present, when all kinds of material as well as labor are lower than they have been for many years; it is therefore, real econ-omy to build now.

From Kona, Hawali, we have the unwelcome news that there is suffering among the native population on account of the searcity of food, the result of the continued drouth there. The Government has taken steps to render immediate relief by sending food forward, and a free passage has been disc to ri. Discribed & Co.

The departure during the same time were, Ros War vessel

Ergysser, for Yokohama; and Mail steamer Zealandia, for

Auckland and Sydney.

On the left inst. the following ressels were on the berth and humane on the part of the Governmen lections were taken up in all the churches of this city on Sunday last for the relief of the sufferers, and a contribution of several hundred dollars has been raised by an organization of native laborers. This is also praiseworthy.

> MIDNIGHT SERENADING .- This is generally a social and pleasing amusement, the music of the occasion expressive of an "aloha" of those for whom it is intended, and enjoyed by all who are fortunate enough to be within hearing distance. Secred and secular vocal music, when rendered by cultivated voices singing in harmony, is soothing and delightful, always intend to with pleasure and eagerness; but when a fellow backs himself up against a gate post for support, and indulges in circular music by singing in a coarse guttural tone, "Carry (hie) the news (nic) to Saran," disturbing the neighborhood with his bellowing, it becomes a nuisance. The good people whose simbers have been disturbed by this love-sick, wabine-sultien disciple of Bacchus, have concluded, should be repeat his serenade, to "make things decidedly pleasant for him in that neighborhood." Lookout, young fellow!

RAILROAD SURVEY .- We learn from His Excellency, the Minister of the Interior, that a competent civil engineer, with a full corps of assistants, will go to the island of Hawali to make a preliminary survey of the Hilo railroad, on September 1st. Mr. Cabot will have charge of the survey. The distance is about 30 miles. This preliminary survey has been ordered in accordance with the provisions of an Act passed at the late session of the Legislative Assembly, which appropriates the sum of \$5,000 for that purpose. Thus the initiative steps have been taken to inaugurate a system of railroads on these Islands which cannot fail to produce the best results in the which cannot fail to produce the best results in the near future. We have labored for months past, through the columns of the Gazztrz, to keep this railroad question before the minds of the legislators and the people, and we are rejoiced to know not without good results, one of which is manifest in the passage of the appropriation to make the first survey for a railroad on the Hawaiian Islands. The promptitude with which His Excellency, the Minister of the Interior, has acted in this matter is an earnest of the deep interest that geutleman takes in the improvements on the Islands. And no less conspicuous is the interest manifested by His Majesty on this railroad question, who made it a special subject of congrainlation to the Assembly in jest on this rairond question, who made it a spe-cial subject of congratulation to the Assembly in his closing remarks to that body. We hope to live to see both railroads and Jines of telegraph, in full operation on the Islands of the Hawaiian group; because we know that such improvements will ac-celerate the trade and commerce of this Kingdom in a manuer that no other enterprise can accomplish.

How to MAKE COFFEE.-It is a singular fact that but few people know how to make coffee as it should be. This is somewhat strange inasmuch as coffee is a universal beverage. There is no nation perhaps where more attection is paid to the making of coffee as in France, nor is there any people who understand the secret of making good coffee ing of comes as in France, nor is there any people who understand the secret of making good coffee so well as the French people, no matter where you find them. Who, that has ever visited New Orleans, Louisians, U. S., has not gone to the French Market in the early morning to get a cap of French Market in the early morning to get a cup of French coffee, served up by the preity and holite women who attend that market to serve coffee to all who come? And who will ever forget the aurprise he experiences on first tasting the delightful beverage as it is prepared by French hands? The whole secret lies in the manner of its preparation, and here is the recipe for making coffee as good as was ever made by the best French exterer: FOREIGN NEWS.

By the arrival of the steamship Zealandia from San Francisco, on the 12th inst., we have dates from the coast down to the 5th inst. EUROPE. DOIRON-In this city, Aug 8th, Mr J J Bolnos, a natio of France, aged about sixty years.

LORDON, August 4.—During the ceremony at Guildhall, on Saturday, of presenting the freedom of the pity to Lords Beaconsfield and Salisbury, considerable sensation was created by a person who, on the appearance of the pienipotentiaries, shouted "Traitors to the Constitution." The disturber was immediately ejected. In his speech at the Mansion Hourse banquet Lord Beaconsfield said he felt confident Her Majesty's Ministers had not only maintained the interests of their own country, but had secured the independence of Europe. He drew a sanguine ed the independence of Europe. He drew a sanguin picture of the prospects from the Anglo-Turkish Convention. In support of the view that it was not hopeless to expect reforms in the administration of the Porte, he cited the statement sent to the Empethe Ports, he cited the statement sent to the Long-err of Germany by American missionaries, setting forth the toleration enjoyed by Christians, progress of education in the Ottoman dominion, etc., since the Crimean war. Lord Beaconsfield said this testi-mony was more preferable than an official re-port—it was that of men of the highest prin-ciples and of sublime character, who devote their lives to the benefit of their fellow creatures. His Lordship said that never within his experience had the relations of the Powers been so friendly. Russing statesmen were convinced that a restless, war since statesmen were convinced that a resultes, war-like spirit must debase, perhaps even rain that Em-pire. The estrangement of France he should regard as one of the greatest misfortunes which could happen to England.

Lord Salisbury also made a speech, indicating that the Government had resolved to fully avail it-self of the right of interference in favor of the good government afforded by an Anglo-Turkish Conven tion. He arged upon British statesmen the sinking of all party differences in support of such policy. The Standard announces in official form that no dissolution of Parliament will occur this year.

A Constantinople dispatch gives a detailed account of the insurrection in Herzegovina, and the assassination of the Governor of Mostar. It is rumored that a serious unpleasantness has arisen between the Italian and Austrian Consuls in Bosnia, in consequence of the suspected connivance of the former in the agitation against Austria.

The report that General Eaufimane would succeed General Todieben is untrue.

BERLIN, August 4 .- It is stated in regard to no goliations at Kissingen that the Vatican demands the repeal of the Anti-Jesuit law and unlimited control of ciercal patronage. It is not thought these demands will be conceded. It is announced that i an agreement is reached by Bismarck and the Papa , the German Parliament will again be dis

It is reported that Nobeling attempted suicide or Saturday with a pair of scissors. Complete returns from the German elections she the following results: Ninety-three Conservatives, 110 of the various parties, and 96 Ultramontanes. Sixty six second ballots will be necessary. CONSTANTNIOPLE, August 4 .- The American Min-

CONTANTNOPLE, August 4.—The American Min-ister has sent the gunboat Despatch to investigate the case of the American lady who founded a mis-sionary school in Thessaly, and who is said to have been seriously molested by the Grocks. PARIS, August 4.-M. Fournier has informed the Sultan that his refusal to grant territory to Greece

might cause complications to which France could not remain indifferent, and the Sultan has promise comply as far as possible. Negotiations are said to be in progress for the cession of Rhodes and Scio to

Rown, August 4 .- Unimportant Italian Irridenta meetings have been held at Leghorn, Cersua and Vellatri. UNITED STATES.

From the United States the news is very meager, owing to the unusually hot weather. From Washington we have news that the Union and Central Pacific Railroad Companies have determined to resist the decision of the Interior Department, on the subject of pre-empting the lands on the line of their roads which have not been disposed of by the company, for so many years. The Secretary's decision is, that such lands can be preempted by actual settlers. This is a righteous decision, and Secretary Shurr deserves the thanks of the people for his courage in teaching the Pacific railroad monopolies, that they are not above the laws. There is also a fight brewing between the Pacific Mail Steamship Company and the Trans-Continental Railroad Companies, about the Trans-Continental Railrond Companies, about the through freight business. The railroad companies having advanced their rates of freight one hundred per cent lately, the Steamship company are making arrangements with the Panama Railroad company by which they expect to carry off the greater amount of the treight between the Pacific coast and New York City. In this arrangement the Steamship company will have the sympathy of the commercial commu-ties, both on the Pacific and Atlantic coasts.

The Indian war in the United States, is still progressing as usual. At the latest dates, the hostiles, that is the Indians, were giving their white enemies lots of fus, to the way of marching and countermarchine with an operational seriumnary of no precessional seriumnary of no precessional seriumnary of no precessional seriumnary. marching with an occasional scrimmage, of no prac-

In Boston the people have secured the valuable services of that paragon of patriotism, purity and eloquence, the renowned Dennis Kearney, from Caliseas of the Hub, on the subject of labor and capital The yellow fever has broken out at New Orleans,

and created great alarm among the people in the latter city, as well as in Texas, and the States bor-dering on the Mississippi river. The heat has been intense all over the States, and has been fatal to human life to an alarming ex-

The most notable event from San Francisco, is the announcement of the death of another of her million-aires, Michael Reese, a native of Frankfort, Germany, but for many years, a citizen of California, and one of the most notable citizens of San Francisco, went to his native country on a pleasure trip, and soo after arriving in his native city, was stricken with apoplexy and died.
